## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

I. **Claims 1-3**, drawn to a protective tool for a therapeutic material delivery device, classified in **class 206, subclass 365**.

II. **Claims 4-15**, drawn to a therapeutic material delivery device, classified in **class 604, subclass 236**.

2. The inventions are distinct, each from the other because of the following reasons: Inventions of Group I and Group II are related as **subcombinations disclosed as usable together in a single combination**. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the invention of Group I has separate utility such as a protective tool for a therapeutic material delivery device (needle), which can be used as a container for a hypodermic needle, per se. The invention of Group II has separate utility such as a therapeutic material delivery device (a type of hypodermic needles), which can be used for fluid injections.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3736

4. A telephone call was made to Gregory J. Maier on November 23, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
